

EXCAVATOR TRAINING

LANTRA 6008

Use of an Excavator to Excavate a Grave or Burial Plot

The course will enable candidates to develop skills needed to excavate a grave / burial plot. To allow the unhindered passage of a coffin during burial.

TYPICAL COURSE CONTENT

- PPE
- Risk assessment
- Health & Safety
- Pre-start checks
- Safety devices
- Legal responsibilities
- Turf protection
- Controls
- Warning lights
- Excavator controls
- Positioning of the excavator
- Levelling of the excavator
- Excavating procedure and techniques
- Backfilling procedure and techniques
- Soil types
- Reinstatement of the ground and surrounding area
- Bucket changing (front and back)
- Working on gradients
- Use of the front bucket

Wherever possible, we will try to use an actual burial for demonstration & assessment, rather than a simulation, depending on the client's requirements, and the student's abilities.
